

# Page 1: Initial State vs Knowledge Gained

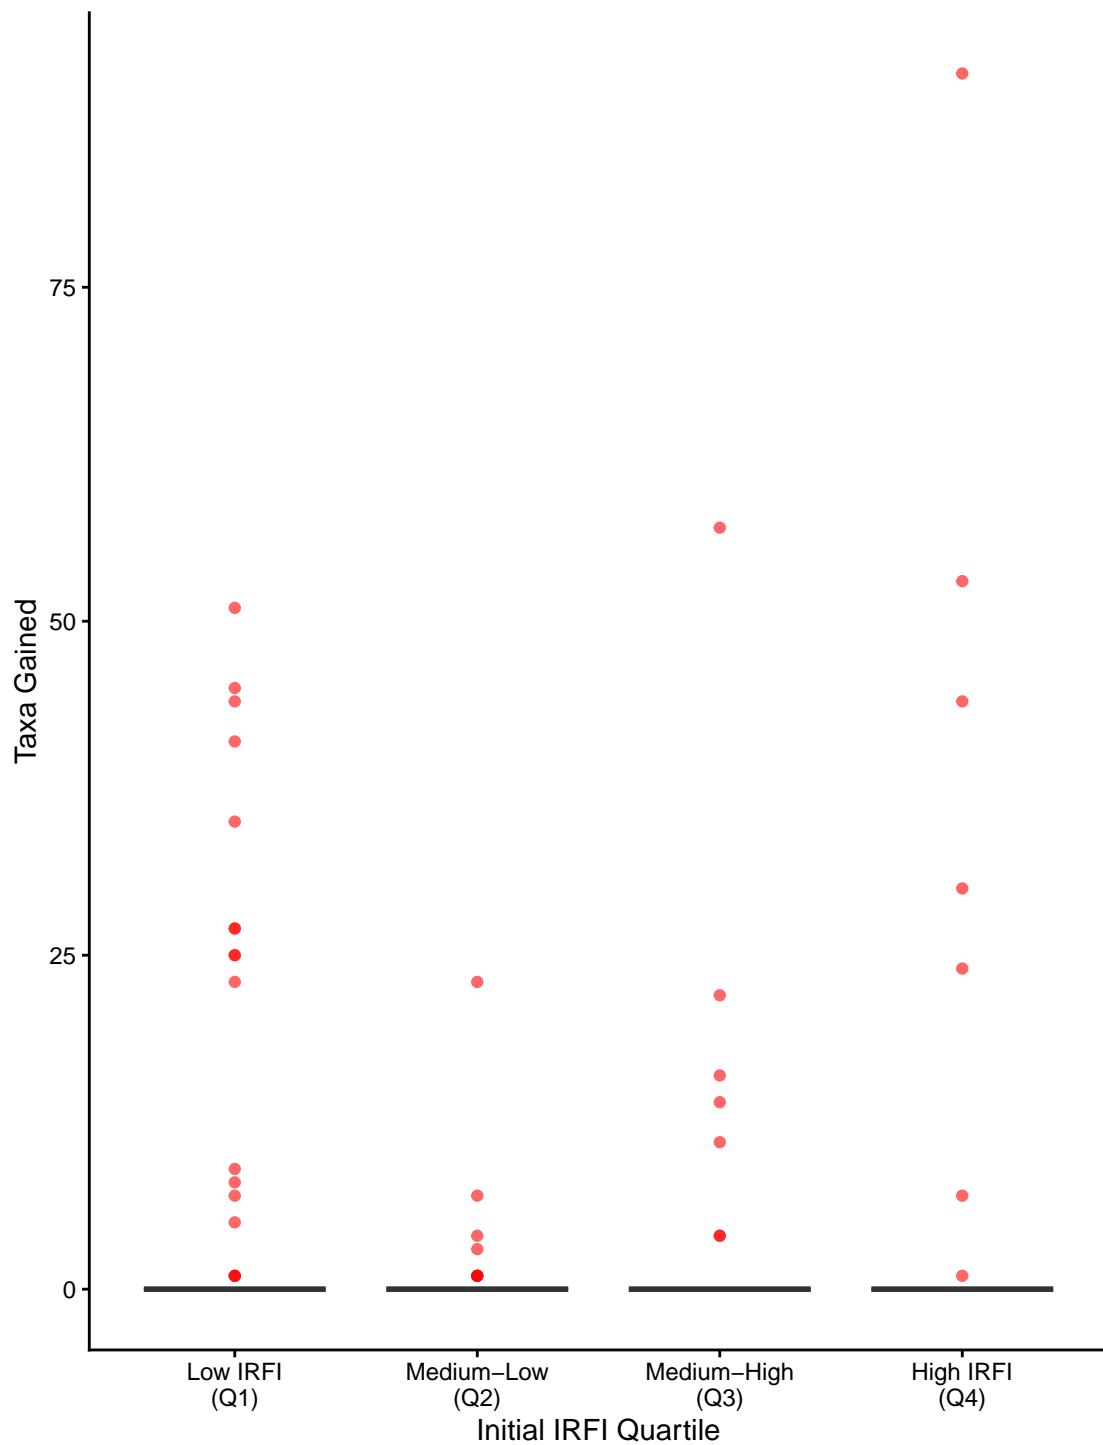

## Page 2: Initial Richness vs Richness Gain

## Page 3: Knowledge Gain Analysis

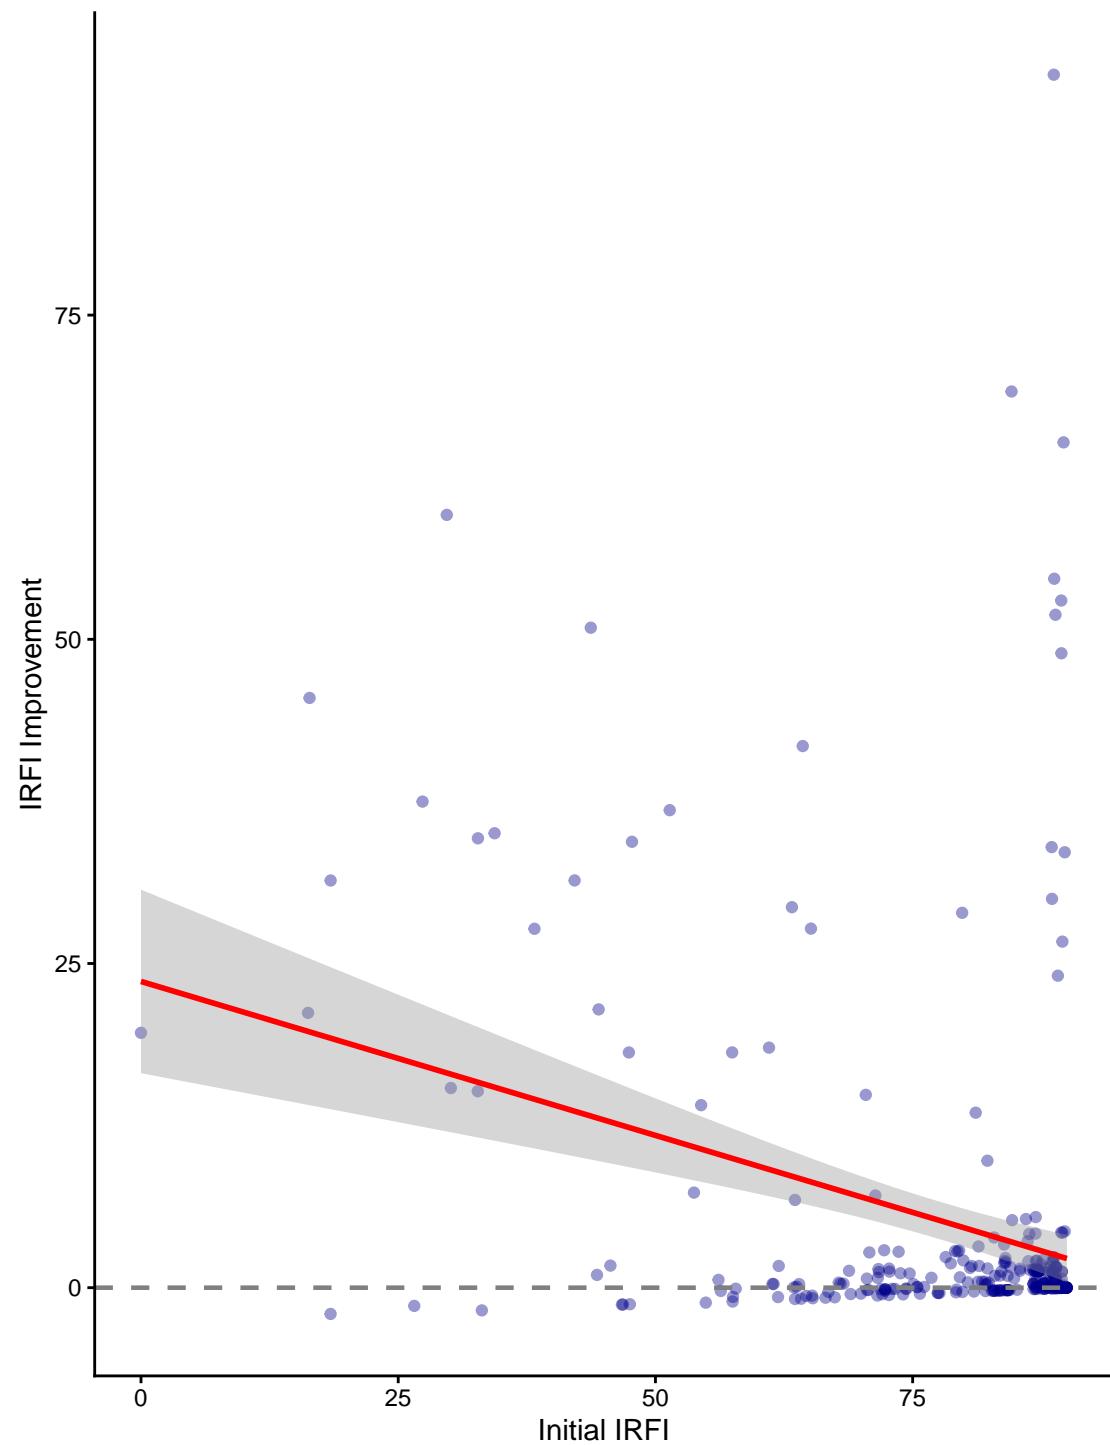

### Richness Gain by Initial IRFI Category

Did high-ignorance cells gain more taxa? (Kruskal–Wallis:  $p = 0.035$ )

### Targeting Efficiency ( $r = -0.29$ )

Positive correlation = effective targeting ( $p < 0.001$ )

## Page 4: Summary Statistics

Statistic	Value
Analysis timestamp	2025-12-01 12:10:37.851845
Elapsed time (secs)	538.95
Comparison method	Incremental (fixed baseline)
Valid cells analyzed	294
Mean IRFI (initial)	77.63
Mean IRFI (updated)	72.44
Mean IRFI improvement	5.18
Mean IRFI improvement (%)	6.7
Median IRFI improvement	0.6
Cells improved (%)	65.3
Cells worsened (%)	34
Mean richness (initial)	9.1
Mean richness (updated)	11.8
Mean richness gain	2.7
Total taxa discovered	9
Correlation (IRFI vs improvement)	-0.293
Targeting efficiency score	72.8
